Wallpaper inauguration on Dinga Dinga disease

Report

Date: 27/12/2024

Dinga Dinga disease is a mysterious illness that has emerged in Uganda, predominantly affecting women and girls. It is characterized by uncontrollable shaking, fever and weakness.

The wallpaper prepared by the students of B.Sc.III Microbiology was inaugurated by the auspicious hands of Principal Dr. R. V. Shejwal Sir on Friday 27-12-2024. The wallpaper was prepared on the recent theme-Dinga Dinga disease. Snehal Karve and Mayuri Salunkhe, both students of B. Sc.III took keen efforts to prepare highly informative and decorative wallpaper.

Dr. V.S.Patil, Head of Microbiology department felicitated and welcomed chief guest Hon. Principal Dr. R. V. Shejwal Sir, Vice Principals from Arts and Science wing Dr. A.S.Tawar and Prof. S.A.Mohite respectively.

Students Snehal Karve and Mayuri Salunkhe explained the topic of wallpaper to the guests and students.

Chief Guest Principal Dr. R. V. Shejwal Sir appreciated the students for their efforts to prepare the attractive wallpaper on recent issues in Microbiology and Life sciences area. He also explained the importance of research in academics and efforts made by the Institution to foster the research culture among students with the various funding support from college to students to complete their ideas in laboratory work resulting into good number of research paper publication in reputed journals and overall development of students and teachers. He gave best wishes to the students for their study and work. He also acknowledged the efforts made by Microbiology students and Staff for successfully organizing this event.

Mr. Ninad Kadam explained the acknowledgement of Institution towards organizing such student based research activities. He delivered vote of thanks.
